Dear SBG Members and Friends,

I would like to congratulate the SBG for its good work in bringing together the Singapore community in Ho Chi Minh City (HCMC). Many members and especially new residents in Vietnam feel happy to meet their fellow Singaporeans through the SBG's various events and makan sessions.

The SBG has continued to be active in 2017/2018. I am pleased to note that its special events such as its dinners for Chinese New Year and our National Day continue to attract a large number of persons. In addition, the SBG has continued with its business interactions and regular events like Raffles Night and hosted and co-hosted events with other Chambers of Commerce and organisations. I understand that the number of guests attending SBG events throughout 2017 was an astounding 4500! May I congratulate the Exco for its good work and I look forward to more activities in the coming year. Singaporeans play an important role in promoting people-to-people ties beyond the traditional political and economic ties that our two countries share and the SBG, through its work and activities in Vietnam, play an important role in this area. In particular, I hope that the SBG's EdFund, which was established in 2000, will continue to provide scholarships to needy students in and around HCMC, as this is a very meaningful symbol of the friendship and cooperation between our two countries.

As we celebrate the 45th anniversary of diplomatic relations between Singapore and Vietnam in 2018, I wish the SBG and its members every success. Let us keep the Singapore flag high in HCMC!

MESSAGE FROM SBG PRESIDENT

NORMAN LIM
PRESIDENT
Singapore Business Group

Hello my fellow Singaporeans, SBG Patron, Members, Associates and Business Partners,

Looking back at 2017, it has been an eventful year back home in Singapore. There has been a lot of economic uncertainty back home and overseas. A new US administration has taken office, with a radical approach to international trade and foreign policy. The regional maritime dispute is still looming over the horizon. Despite the overcast, Singapore's economy still managed to grow by 3.5% which was more than doubled what has been forecasted.

In Vietnam, we saw a 10 year high of 6.8% growth in 2017 which came in slightly higher against an ambitious target of 6.7%.

Vietnam has also attracted more than 1,900 foreign direct investment (FDI) projects from Singaporean businesses between January to October last year valued at US\$41.7 billion. Singapore is investing in 18 out of the 21 economic sectors in Vietnam, including the manufacturing and processing industry with 548 projects worth nearly US\$18 billion, making up 44 percent of the country's total investment in Vietnam. Singapore has also invested in 48 out of the 63 cities and provinces in Vietnam. The southern metropolis of Ho Chi Minh City drew the biggest number of Singaporean projects (992) with total registered capital of US\$10.3 billion, followed by Hanoi capital (310 projects) (source: Vietnam Economic News).

Since our business group's inception in 1992, we have gone through several reforms and revamps and we are still evolving. But what are the principles that drive our efforts?

I will give you a big one: Economic growth.

We live by the idea that if it is good for growth, it is good for everyone—every business, every worker, and every community. Currently our economy in Singapore is a historic stretch of slow growth—hovering at a seasonally-adjusted annualized basis of 2.1 percent (source: Trading Economics). We need to do better if we want job creation and business growth for Singaporeans. That was the first reason why most of our fellow Singaporeans came to Vietnam, to build their businesses (either for themselves or others) in a new market. Our business group continues to work with our members, associates and business partners to explore commercial opportunities in and around Vietnam. We will continue to focus on business related forums and activities to open doors for future business partners across various industries and market segments.

But beyond growth, there's another principle that drives our efforts here in our office — and it is the very principle that we are “home” away from home. We try to bond our fellow countrymen in every way feasible and possible. To be successful in what we do, we will continue to need your support and patronage.

It has been a wonderful journey with you in 2017 and we definitely look forward to a successful 2018.

I wish all of you a very happy and prosperous 2018!

VSIP-Sembcorp Gateway Development Co. Ltd is under a joint venture by VSIP Joint Venture Co., one of the largest integrated land developers in Vietnam, our partners and shareholders: Singapore's Sembcorp and Japan's MC Development Asia (through parent company Mitsubishi Corporation) who have delivered real estate development projects in Singapore, Japan, North America, China and ASEAN.

The Habitat, the first part of VSIP I Mixed Development project sits on a 4.1-hectare land plot which is developed into a mid-market residential project of about 163,807 square metres gross floor area, comprising 1,380 apartment units and amenities. Phase one comprises two blocks of 250 apartment units. The Habitat is part of the developer's efforts to develop projects that complement the functions of VSIP, delivering an integrated urban work and living environment that enhances the attractiveness of VSIP.

The Habitat will give you a home whose quality and design you can always depend on. The design is fully precast, to avoid on-site waste and make construction efficient. This design uses passive design for the tropics. The innovation is the external, covered spaces between the blocks. These social and community spaces in the sky are a way to ensure that high rise, high density projects do not cause alienation, but instead can be vibrant living, low energy communities.

Our values:

- **Trust** - Our clients know we've got their backs, no matter what – that's why they trust us to help them achieve their business and life goals.
- **Responsiveness** - Business never stands still – so we don't either. Our creative and dynamic approach means we're always on hand with the fresh thinking and personalised advice our clients need – often before they even know it.

**Chosen by
industry

Your business is special and unique. No one else shares your history or your dreams for the future. As new markets develop and technology evolves, your business operates on an increasingly international scale. And when you're branching out into the unknown, you can't beat a bit of local knowledge. So when you need professional support – because let's face it, everyone does – you need more than the kind of standard services that are increasingly routine, commoditised, and at times, old-fashioned. You'll need those for your daily requirements, of course, but when it comes to the really important things – decisions that keep you awake at night – you don't just need an ordinary service provider. You need one of a special kind. You need an ally, a confidant, a friend.

Sure, you need someone with deep understanding of professional challenges and opportunities. You need someone with the right experience and connections – because the help you need no longer falls neatly into standard professional service categories. But what you need most is someone who understands you and your business. Someone who will find ways to help you without even having to be asked. Someone who is at your side to help you reduce the learning curve. Someone to whom you deserve seniority attention. Someone who is uber the traditions. Someone from NNC.

NNC combines expertise with empathy better than any other professional service firm because we know the local regulations, practice, and business culture and needs inside out. Of course, we offer the very best advice there is. Our clients are testaments to our expertise and service quality. Many of our clients can be instantly recognised as world-class companies and leaders in their field such as manufacturing, fast-moving consumer product, petroleum, pharmaceutical, education, logistics, trading and distribution, or hospitality etc. They choose a boutique firm like us obviously not because of our size but because they know that the best must be serviced by the best, and because we service them like no others. We go beyond the traditional accountant's role to mentor and advise them through thick and thin - wherever their ambitions take them. Our clients do not really think of us as one of those traditional accounting firms. They think of us as their long-term and trusted advisors in modern time, because we do not just provide services - we also deliver value and guide them through professional challenges to enable them to achieve both business and personal goals. It is how we make a difference.

Our mission is to become Vietnam's leading boutique professional service firm that businesses and professionals are proud to be part of our circle, in matters of business and much more. Contact us today at nnc@namnguyenconsulting.com or +84 9384 64763, or visit us at www.namnguyenconsulting.com.

The unique ABLOY lock and key was invented in 1907 by Emil Henriksson, an office machinery mechanic in Helsinki, Finland. While repairing a cash register, he realised that the rotating cylindrical disks of the machine were eminently suitable for use as a lock mechanism.

The first locks went on sale two years later and lock production at Ab Låsabriken – Lukkotehdas Oy began in 1918. The name ABLOY is formed from the letters of this company's name.

ABLOY has been the symbol of High Security Locks with Superior Performance since 1907. ABLOY is one of the leading manufacturers of locks, locking systems, architectural hardware and electromechanical locking technology.

The regional HQ of ABLOY South East Asia operates as a business unit of ASSA ABLOY Singapore Pte Ltd, and we are present in many of the South East Asian countries through a network of qualified distributors and dealers.

Our key customers are mostly professional end-users in critical infrastructure projects; namely in utilities, telecommunications, data centres, banking, airports and also security of military equipment.
